EXPERIMENT

Title

MISSING ALPHABETS

Description

Pangram is a sentence containing every letter in the English alphabet. Given a string, find all characters that are missing from the string, i.e., the characters that can make the string a Pangram. We need to print output in alphabetic order.

For example,

Input: welcome to geeksforgeeks

Output: abdhijnpqvxyz

Source Code:

```
def find_missing_characters(s):  
    alphabet_set = set('abcdefghijklmnopqrstuvwxyz')  
    input_set = set(s.lower())  
    missing_characters = alphabet_set - input_set  
    missing_characters_sorted = ''.join(sorted(missing_characters))  
    return missing_characters_sorted  
  
input_string = input()  
result = find_missing_characters(input_string)  
print(result)
```
